A HISTORY OF DOING IT RIGHT

In 1955 Plan Group began as a Toronto based electrical contractor. Today our hard work, integrity, successful track record and our key involvement in major construction projects across Canada has seen us evolve to become North America's most innovative and dependable electrical, mechanical, network cabling and life safety constructor.

Our depth of resources includes a state of the art warehouse, technical training centre, machine shop, CAD design department, Primavera trained estimating team, truck fleet, the most modern tools and equipment in the industry and a 600-plus member skilled workforce. This depth and breadth of resources, combined with our assignment of both a dedicated account and project manager to your project is your assurance that you'll receive the most innovative dependable solutions and service available - Plan on it.

Our projects have included financial institutions, pharmaceutical and manufacturing facilities, sports, entertainment and retail complexes, hospitals, technology centres and airports. Whether your requirements call for our skills in project management, new construction, renovations and alterations, maintenance or modifications, we're there with our quality people and quality service - We are Performance Driven.

OUR MISSION PLAN

Plan Group is the dependable choice for quality service in electrical, mechanical, network cabling and life safety systems work. Our qualified experts will offer reliable innovative solutions to fulfill your needs. *Simply put... We are Performance Driven.*

ELECTRICAL

From the installation of a single outlet to interior renovations or large construction projects, our large project teams have completed and continue to work on some of the most difficult and demanding projects in Canada. The Plan Group is an expert in maintaining 100% uptime of your facility, offering emergency response 24 hours a day, 7 days a week, 365 day a year.

MECHANICAL

Many of our mechanical tradesmen are multi-certificate holders, demonstrative of their dedication to better our clients. Emergency 24 hour service is always available for our clients. Our Maintenance Service Packages are in very high demand as our proactive approach to equipment servicing will not only avoid untimely failures but the inherent high costs associated with them. Plan Group's Mechanical/Combined Services Division needs to be a key member in your facilities service team.

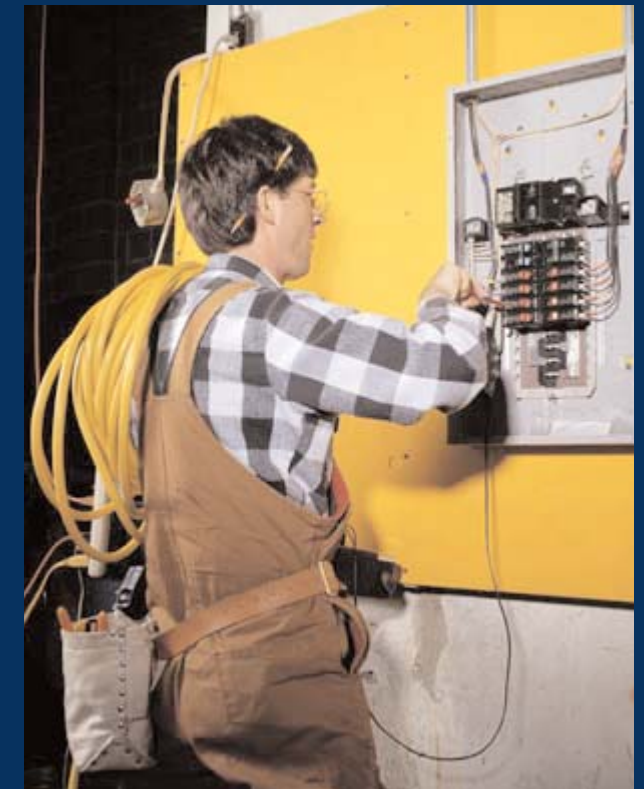

COMMUNICATIONS

Plan Group has become one of the largest installers of communications cabling in Canada. Our competencies include inside structured cabling, fiber optic cabling, outside plant cabling, and wireless LAN installations. Our many on staff Registered Communication Distribution Designers (RCDD) offer clients a vast depth of expertise to assist with network implementation strategies. Our manufacturing partners are:

LIFE SAFETY SYSTEMS

Our CFAA certified technicians have excellent working relationships with the leading Fire Alarm consultants. We keep large office/commercial buildings running with minimal down time due to false alarms, and service breakdowns. Along with our 24/7 dedicated service team, we offer the best service in the industry. We provide a turnkey service that gives you peace of mind knowing that everything has been addressed. Choosing Plan Group as your Fire and Life safety contractor is your first step towards worry-free service and the safety and well-being of your tenants and properties.

WHY GO WITH PLAN GROUP

DEPENDABLE CHOICE

When you choose Plan Group for your project, we assign an exclusive account manager to your job. This individual acts as your personal contact with the project manager and the team. All of the details are prepared and handled by this individual. From the moment the team starts until the moment they finish, they are dedicated only to the completion of your project. It's this special attention that makes us more efficient and effective.

QUALITY SERVICE

From our friendly customer service staff to our service people, Plan Group strives to make every client feel like the most important client we have. Our ability to design custom preventative maintenance programs allows us to anticipate problems and reduce your down-time.

Our professionals respond quickly and take the necessary time to explore every angle and option, providing you with only the best solutions. Give us a call any time. Even on short notice, we'll provide you with consistently friendly, knowledgeable and effective service.

QUALIFIED EXPERTS

Plan Group has been in business for over 50 years. Our entire company from top to bottom consists of contractors who understand how the industry works.

Our servicemen have years of experience in troubleshooting repairs. Our electricians are well versed in all aspects of electrical construction. Our commitment to you is in knowing how buildings operate, especially when we've wired so many of them. Our staff will always provide cost-effective solutions that fit our clients' needs.

INNOVATIVE SOLUTIONS

We are dedicated to maintaining the smooth operation of your systems through the use of specialized proprietary equipment and the skills of our multi-disciplined company.

Every client deserves a unique solution that fits their needs. Rather than cookie-cutting the same strategies, Plan Group explores, thinks and provides innovative solutions that solve problems in a way that make the most sense. Let us show you how thinking outside the box can help make everything inside the box work better.
